PROFESSIONAL SUMMARY

Software Engineer with **3.5+ years** of experience shipping enterprise web and mobile products for **Citi, Marriott and Colina Insurance** using **React, Angular, React Native and TypeScript**. Builds **Python** automation and data pipelines and **LLM-powered** tools (Gemini and Claude APIs, prompt engineering, agentic workflows) end to end, from the Python backend to the React UI. **Claude Certified Architect and Developer** and **AWS Certified Developer**. Strong in performance (page load cut from 4.1s to 2.6s), testing (90%+ coverage), CI/CD and mentoring (50+ engineers).

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Python & Backend: Python scripting & automation, data processing (JSON/CSV/Excel), REST API design & integration, webhooks, Node.js/Express, unittest/pytest-style test suites, argparse CLIs

Generative AI: LLM API integration (Google Gemini, Anthropic Claude), prompt engineering, structured-output validation, agentic workflows & AI coding agents (Claude Code, GitHub Copilot)

Frontend & Mobile: React.js, Next.js, Angular, React Native, Tailwind CSS, Micro-frontends, Redux Toolkit, Context API, TanStack Query/Table, Vite, Webpack

Testing & Quality: Jest, Jasmine, Karma, SonarQube, Checkmarx, Gherkin/BDD, WCAG 2.1 (a11y), Core Web Vitals

Cloud, DevOps & Data: AWS (EC2, S3, Lambda), Docker, Kubernetes, OpenShift, Helm, Jenkins, Harness, Kafka, Apache Flink, PostgreSQL, MongoDB, Redis, Firebase, Git, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer I – HashedIn by Deloitte Jul 2024 – Present

- Developed enterprise application features in **React.js and Angular** and built reusable component libraries that enforce design-system standards across teams.
- Raised unit and integration test coverage to **90%+** (Jest, Jasmine), reducing production bugs and keeping releases **WCAG**-compliant.
- Cut average page load time from **4.1s to 2.6s (~37%)** through code splitting, lazy loading and Core Web Vitals fixes.
- Built an **automated testing utility** that removed a critical release bottleneck (Rising Star Award), and mentored **50+ interns** through code reviews and onboarding.

Software Engineer Trainee – Damco Solutions Jan 2023 – Feb 2024

- Shipped **2 production React Native apps** to the App Store and Google Play, integrating Firebase, Realm DB, Redux and JWT authentication.
- Resolved **180+ critical UI and API integration defects**, bringing UAT releases to a stable state.

KEY PROJECTS

AI Job-Search Automation Platform (Personal) – Python · React · GenAI Sep 2026 – Present

Python, React 19, TypeScript, Vite, Tailwind CSS, Node/Express, Google Gemini API, Claude Code, Google Sheets (Apps Script)

- Built a full-stack platform that automates job search end to end: **Python pipelines** source, score and track jobs, companies and recruiters, and a **React + TypeScript** dashboard shows the results.
- Wrote dependency-free **Python** tools (~2.7K LOC) that generate Excel trackers directly from OOXML, sync 130+ target companies and push records to Google Sheets through a **webhook API**.
- Built **LLM-driven workflows** (Gemini, Claude) for skill-gap analysis, job-match scoring and personalized recruiter outreach, with **Python validators** that enforce output rules such as message length, required tokens and agency distribution.
- Added a **4-tier Python test suite** (feature, boundary, cross-feature and acceptance) and pixel-accurate PDF resume export from the React UI.

Marriott – mTrust Incident Management Mar 2026 – Present

React.js, TanStack Query/Table, Context API, Webpack, ServiceNow REST APIs

- Owned the full front-end lifecycle of the Coordinator workspace and worked with backend engineers on API contracts, so incidents are processed without depending on ServiceNow.
- Built custom ticket filtering, automated email triggers and high-performance tables with **TanStack Table and TanStack Query**.

- Reduced bundle size through route-based code splitting, dynamic imports and asset optimization, and closed critical UAT defects before production launch.

Citi Bank – Trade Settlement Platform Jan 2025 – Feb 2026

Angular, TypeScript, Kafka, Apache Flink, Helm, Jenkins, Harness, OpenShift, Gherkin/BDD

- Engineered high-throughput **Angular** interfaces for trade-settlement visualization, with multi-row grid management and bulk Excel data processing.
- Built an internal **data-mapping comparison tool** that automated manual QA database checks on contract data.
- Designed **Gherkin/BDD test suites** for **15+ services** that validate consumed **Kafka** messages against expected outputs through Harness post-install hooks.
- Migrated CI/CD for **3 enterprise applications** from Jenkins, TeamCity and GitHub to **Harness, uDeploy and Lightspeed**, and led build-tooling upgrades and **Apache Flink** version migrations.
- Fixed critical security and access-compliance defects, including **Checkmarx** static-analysis findings and CAMP authorization issues.

Colina Insurance – Mobile Application Jul 2023 – Feb 2024

React Native, TypeScript, Redux Toolkit, Firebase, Realm

- Built a cross-platform insurance app with **offline sync** (Realm DB) and Firebase authentication that renders consistently across iOS and Android screen sizes.

CERTIFICATIONS

- **Claude Certified Developer (CCDV-F)** – Anthropic (Sep 2026) · **Claude Certified Architect (CCA-F)** – Anthropic (Jun 2026)
- **AWS Certified Developer – Associate** (Apr 2026) · **AWS Certified Cloud Practitioner** (May 2025) · JavaScript Security Specialization – Coursera (Mar 2025)

AWARDS

- **Excellence Award** (Deloitte, Jun 2026): technical leadership on high-impact production releases and authoring Architecture Decision Records (ADRs).
- **Excellence Award** (Deloitte, Jan 2026): managed Citi client deliverables while leading a 1-week Angular training track for 50+ interns.
- **Rising Star Award** (HashedIn by Deloitte, May 2025): built an automated testing utility that resolved critical release bottlenecks.

EDUCATION

B.Tech, Computer Science – Lovely Professional University (CGPA: 7.61) 2019 – 2023
